

# YOUR VALUE-BASED CARE ENABLEMENT PARTNER

Supporting Your Success in the Episode Quality Improvement Program (EQIP)

## Our Story

- As a value-based care organization from the ground up, we have been equipping providers / entities to succeed in value-based care since 2014.
- We are a value-based care enabler, providing the support practices need to thrive for achieving their quality and financial goals.
- Free from investors, we empower practices to maintain their independence and identity with tailored solutions.

## Our Expertise

- **Practice Transformation:** We guide practices through value-based care with strategies to optimize workflows and enhance leadership engagement.
- **Advanced Data Analytics:** We empower practices with insights to improve outcomes and achieve program targets.
- **Collaborative Care Integration:** We implement value-based care programs across settings, ensuring coordination and improved outcomes.

## Our Achievements

- **Top Care Transformation Organization:** Ranked among the best in key quality metrics within the Maryland Primary Care Program.
- **Excellence in Value-Based Care:** Over two decades of leadership, national recognition, and over \$33M in Medicare Shared Savings.
- **Data-Driven Success:** Robust healthcare analytics platform with a proven track record of success for shared savings.

## Data Analytics & Population Health Management

## Practice Transformation & Leadership Engagement

- **Comprehensive Data Integration:** Aggregating clinical, claims, SDOH, CRISP, and historical utilization trends to create a 360-degree patient view, enabling targeted interventions for high-risk populations.
  - **Data-Driven Insights:** Leverage CRISP data and align it with your EHR insights to provide actionable recommendations tailored to your practice.
  - **Real-Time Event Notifications:** Through CRISP ENS integration, receive immediate updates on patient admissions, discharges, and ER visits to close care gaps promptly.
  - **Insights at the Point of Care:** Integrated with all certified EHRs, delivering actionable reports and critical patient data—health history, risk factors, and care gaps at your fingertips.
- **Comprehensive Workflow Analysis:** Identify gaps in your current processes and uncover opportunities for improvement.
  - **Actionable Best Practices:** Implement proven strategies to enhance operational efficiency. Address areas where your practice is falling behind with targeted solutions to move the needle forward.
  - **Streamlined Program Support:** Skip the need to hire a program manager—our expert team will guide you through understanding the program, its requirements, and how to succeed.
  - **Customized Improvement Strategies:** Simplify program requirements and optimize your workflow for measurable results.

At Netrin Health, we bring over two decades of experience in Maryland's healthcare landscape, offering innovative solutions designed to meet the unique needs of providers and practices across the state.

Our approach combines local expertise with cutting-edge strategies to help you navigate the complexities of the Episode Quality Improvement Program (EQIP).

## EHR Optimization & Interoperability Solutions

- **Custom EHR Templates:** Tailor templates to capture EQIP quality measures efficiently, reduce clinician burden, and support reporting for value-based care.
- **Seamless Interoperability:** Ensure real-time, bidirectional data flow between EHRs and CRISP, improving care coordination, transitions, and access to up-to-date patient records
- **Real-Time Alerts & Trigger Codes:** Embed CRISP ENS notifications and PACES-based trigger codes in workflows to prompt timely interventions for admissions, discharges, and ER visits.
- **Actionable Point-of-Care Insights:** Deliver integrated reports and patient data including risk factors, care gaps, and social determinants of health within certified EHRs to inform clinical decisions.

## Care Management & Multidisciplinary Care Teams

- **Care Transitions:** Support patients through hospital, ED, and post-acute transitions with follow-up, medication reconciliation, and continuity of care.
- **Care Coordination:** Align care teams, workflows, and digital tools to close care gaps and address functional, psychosocial, and financial needs.
- **Patient Education & Behavior:** Empower patients through chronic disease education, self-management coaching, and goal setting to improve health outcomes.
- **Community Resource Connections:** Connect patients with housing, food, transportation, and social services through partnerships with local community-based organizations.

As a trusted Maryland-based EQIP partner, Netrin Health delivers innovative solutions to help entities achieve program goals. With over a decade of value-based care expertise, we provide the people, processes, and tools for success.
